

README

1)WifiController app is a an android app.

2)A app will control the phone's wifi mode like on and off.

3) We have given "CHANGE_WIFI_STATE" user permission in androidmanifest.xml file (so we can easily change wifi mode by getting that permission)

3)There will two buttons, one is "Turn on" another one is "Turn off",

➤ Turn on:

If the user press the "Turn on" button,

- ❖ A toast message "Wifi Turn ON" will popup
- ❖ And then wifi will be turned on!

➤ Turn off:

If the user press the "Turn off" button,

- ❖ A toast message "Wifi Turn Off" will popup
- ❖ And then WIFI will be turned off!
